you're okay." and while that may sound like a nice effect, it's kind of annoying after a while because you just keep thinking to yourself "okay i get it...everything is fine

the all important protein from milk comes from the milk solids (milk is composed of approximately 87 water and 13 solids)

and today, while reading, i had a beautiful moment of realizing, accepting, and loving that about myself.

most terrifying fact about the universe is not that it is hostile but that it is indifferent, but if we can

body heat makes it melt right in under your eyes and go on so smoothly there's a three month trial period
